

Dear statistics students,

for your info (if you missed it during the first lecture)

The script of the lecture can be downloaded from my homepage ->
lectures -> Statistical Methods

<http://www.usm.uni-muenchen.de/people/puls/statistics/statistics.html>

The download region for problem sets and additional material can be accessed from the same page, after clicking on 'click here' (3rd line of page)

Please find enclosed the plan for our lecture course.

As discussed, lectures will start at 12.15 (Mondays), and tutorials will take place on Wednesdays, 8.30 - 10.00

When you are ill and cannot participate in the tutorials, inform me *in advance* via email!!!

When you are ill for a longer period, please show me a confirmation from your doctor. Be prepared that in such a case you might have to pass an additional exam.

During the tutorials, you will be asked to discuss your solution of specific problems from the corresponding problem sheet at the blackboard. Your presentation will be graded. Minimum number of presentations is 3 per person!

During the last tutorial date (July 13), you will have to pass a written exam. For the final grade, this test will count by 70%, whilst the average grade from the tutorials will count by 30%.

Best regards, Jo Puls

Lecture: Monday, 12.15 - 13.45
Exercise: Wednesday, 08.30 - 10.00

#	Lecture Monday	tutorials Wednesday	discuss problem set #
1	April 11	--	--
